Measure with Cubes

1st Grade Math · Interactive Math · Explore & Reflect

Name: _____ Date: _____ Class: _____

Get started

Line up cubes end to end to measure a crayon, marker, pencil and ribbon. See why gaps and overlaps give wrong measurements, then compare the lengths. Open the tool and use it to answer each question.

Explore

1. How many cubes long is the pencil?

2. How many cubes long is the crayon?

3. How many cubes longer is the pencil than the crayon?

4. Put the crayon, marker, pencil and ribbon in order from shortest to longest.

5. Measure the pencil with gaps. How many cubes reach the end? Is that the real length?

6. Measure the pencil with overlapping cubes. How many cubes? Is that right?

Reflect

7. Reflect: Why must the cubes touch with no gaps and no overlaps?
