Tens and Ones Builder

TEACHER KEY

1st Grade Math · Interactive Math · Explore & Reflect

Get started

Build numbers to 120 with ten-rods and ones cubes, bundle 10 ones into a ten, break a ten apart, and compare two numbers with >, = and <. Open the tool and use it to answer each question.

Explore

1. Build 46. How many tens and how many ones?
   4 tens and 6 ones
2. Build 17 using only ones. Then bundle. What do you have now?
   1 ten and 7 ones
3. Show 32 as 2 tens and some ones. How many ones do you need?
   12 ones
4. Build 7 tens. What number is it?
   70

Explore more

5. How many tens make 100?

10 tens

6. Compare 58 and 85. Write >, = or <.

58 < 85, because 5 tens is less than 8 tens

Reflect

7. Reflect: Why is 1 ten the same as 10 ones?

A ten rod is 10 ones put together, so it is worth 10.

Teacher notes

- Ask students to build the same number two ways (34 as 3 tens 4 ones and as 2 tens 14 ones) and explain why both are 34.
- For teen numbers, build 10 ones, bundle them, and say “one ten and ___ ones.”
- In Compare, ask students to say the comparison in words: “58 is less than 85.”

Standards: 1.NBT.A.1, 1.NBT.B.2, 1.NBT.B.3. Accept any correct answer where several are possible, and ask students to explain with the tool’s picture.
