Equal Shares and Square Grids

2nd Grade Math · Interactive Math · Explore & Reflect

Name: Date: Class:

Get started

Cut circles and rectangles into halves, thirds and fourths, color the shares, and build rectangles from rows and columns of same-size squares. Open the tool and use it to answer each question.

Explore

1. Cut a circle into 3 equal shares. What is each share called?

2. How many thirds make one whole?

3. Which is bigger: one third or one fourth of the same rectangle?

4. A rectangle has 3 rows and 4 columns of squares. How many squares are there?

5. Find another way to make a rectangle with 12 squares.

6. Are equal shares of the same shape always the same shape? Explain.

Reflect

7. Reflect: Why must the shares be the same size to be called thirds?
