Coin and Bill Counter

TEACHER KEY

2nd Grade Math · Interactive Math · Explore & Reflect

Get started

Add pennies, nickels, dimes, quarters and dollar bills. Count on from the biggest value, and find different ways to make the same amount. Open the tool and use it to answer each question.

Explore

1. How much are 2 quarters, 1 dime and 3 pennies?

63¢

2. How much are 3 dimes and 4 nickels?

50¢

3. How many nickels make a quarter?

5 nickels

4. How much are one $1 bill and 2 quarters?

$1.50

Explore more

5. Make 47¢ with the fewest coins. Which coins did you use?

1 quarter, 2 dimes and 2 pennies (5 coins)

6. Ana has 80¢. She buys a pencil for 65¢. How much money is left?

15¢

Reflect

7. Reflect: Why is it easier to count the coins worth the most first?

Big jumps first, then small ones: 25, 35, 45, 46, 47 is quicker than counting pennies first.

Teacher notes

- Ask students to count aloud along the running total shown in the tool.
- Pose making-change stories: “You have $1.00 and spend 65¢.”
- Use “fewest coins” to build number sense with 25s and 10s.

Standards: 2.MD.C.8. Accept any correct answer where several are possible, and ask students to explain with the tool’s picture.
