# Place-Value Blocks to 1,000

TEACHER KEY

2nd Grade Math · Interactive Math · Explore & Reflect

## Get started

Build three-digit numbers with hundreds flats, tens rods and ones cubes. Bundle and break apart blocks, and see standard, expanded and word form. Open the tool and use it to answer each question.

## Explore

1. Build 628. Write it in expanded form.
   **600 + 20 + 8**
2. How many tens are in 340? (Hint: show it with only tens.)
   **34 tens**
3. Build 9 hundreds, 0 tens and 6 ones. What number is it?
   **906**
4. Build 715. Write it in word form.
   **seven hundred fifteen**

2nd Grade Math · Interactive Math · Explore & Reflect

## Explore more

**5.** How many hundreds make 1,000?

**10 hundreds**

**6.** Compare 482 and 428. Write >, = or <.

**482 > 428, because 8 tens is more than 2 tens**

## Reflect

**7.** Reflect: Why do we write a 0 in 405?

**There are no tens. The 0 holds the tens place so the 4 still means 4 hundreds.**

## Teacher notes

- Ask for two ways to build the same number (512 = 5 hundreds 1 ten 2 ones = 4 hundreds 11 tens 2 ones).
- Use Break to prepare for subtraction with regrouping: “I need more tens, so I break a hundred.”
- Compare numbers by building both and comparing hundreds first, then tens, then ones.

**Standards:** 2.NBT.A.1, 2.NBT.A.3, 2.NBT.B.7. Accept any correct answer where several are possible, and ask students to explain with the tool’s picture.
