Ruler and Line Plot

2nd Grade Math · Interactive Math · Explore & Reflect

Name: Date: Class:

Get started

Measure pencils with an inch or centimeter ruler, including pencils that do not start at 0, and record each length on a line plot. Open the tool and use it to answer each question.

Explore

1. A pencil starts at 0 and ends at 6 on the inch ruler. How long is it?

2. A pencil starts at 2 and ends at 9 on the inch ruler. How long is it?

3. Is a centimeter or an inch longer? Which unit gives a bigger number for the same pencil?

4. A line plot has × marks at 3, 5, 5, 6 and 7 inches. How many pencils were measured?

5. On that line plot, which length is the most common?

6. How much longer is the longest pencil (7 in) than the shortest (3 in)?

Reflect

7. Reflect: Why do you count spaces on a ruler and not the marks?
