Scaled Graph Builder

TEACHER KEY

3rd Grade Math · Interactive Math · Explore & Reflect

Get started

Show pet votes on a scaled picture graph (each face can stand for 2, 5 or 10) and on a bar graph that counts by 2s, 5s or 10s. Answer how many more and how many fewer. Open the tool and use it to answer each question.

Explore

1. With a key of 2, how many faces show Fish (20 votes)?
   10 faces
2. With a key of 5, how many faces show Fish?
   4 faces
3. Dogs have 12 votes. Can a key of 5 show 12 with whole faces? Explain.
   No. 12 is 2 faces (10) and part of a face for 2 more.
4. How many votes are there in all? (Dogs 12, Cats 8, Fish 20, Birds 6)
   46

Explore more

5. How many more votes does Fish have than Birds?

14 more

6. On a bar graph that counts by 5s, between which two numbers does the Dogs bar end?

Between 10 and 15 (at 12)

Reflect

7. Reflect: When is a bigger key or scale helpful?

When the numbers are big, so the graph is not too long and is quicker to read.

Teacher notes

- Ask students to choose the best key for a set of data and explain why (no partial faces, not too many pictures).
- Pose two-step questions: How many more Fish than Cats and Birds together?
- Students can step votes by 5 to build larger data sets quickly.

Standards: 3.MD.B.3. Accept any correct answer where several are possible, and ask students to explain with the tool's picture.
