Rounding Number Line

TEACHER KEY

3rd Grade Math · Interactive Math · Explore & Reflect

Get started

See any number from 0 to 999 between two tens or two hundreds, find the halfway point and round. Then estimate sums and differences. Open the tool and use it to answer each question.

Explore

1. Round 63 to the nearest 10.
   60
2. Round 85 to the nearest 10.
   90 (85 is exactly halfway, so round up)
3. Round 449 to the nearest 100.
   400
4. Round 650 to the nearest 100.
   700

5. List all the whole numbers that round to 70 (nearest 10).

65, 66, 67, 68, 69, 70, 71, 72, 73, 74

6. Estimate 278 + 419 to the nearest 100. Then find the exact sum.

300 + 400 = 700. Exact: 697.

Reflect

7. Reflect: Why do we look at the halfway point when we round?

Numbers before halfway are closer to the lower ten or hundred; numbers at or after halfway round up.

Teacher notes

- Have students predict the rounded number before switching between Nearest 10 and Nearest 100.
- Ask for all the numbers that round to 70 — a good way to see the halfway rule.
- Use Estimate to check reasonableness of written addition and subtraction (3.OA.D.8).

Standards: 3.NBT.A.1, 3.NBT.A.2, 3.OA.D.8. Accept any correct answer where several are possible, and ask students to explain with the tool's picture.
