Explore more

6. Convert 3 lb 4 oz to ounces.

52 oz

7. When do you multiply to convert? When do you divide?

Multiply going to a smaller unit; divide going to a bigger unit.

Reflect

8. Reflect: Why does the number get bigger when you change feet to inches?

Inches are smaller, so it takes more of them to make the same length.

Teacher notes

Accept equivalent forms (for example 1/2 = 2/4 = 0.5) and any correct example where several answers are possible. Have students explain using the tool’s picture.
